NEWSROOM OPERATIONS

CMS Role SOP

A daily guide for Reporter, Copy Editor, Admin, and Super Admin—from reporting package to verified public release.

Version 1.3 - media requirements verified 12 October 2026 **Reviewed 14 July 2026**

Desktop + Mobile

Reporter

Capture a complete Story package, save it, submit once, and respond to desk feedback.

Copy Editor

Claim submitted work, verify and improve it, request changes, or mark it ready.

Admin

Assign the desk, approve the finished work, publish safely, distribute, and monitor.

Start here

1. Open `lokswami.com/signin?redirect=/admin`.
2. Sign in with the approved staff login or enabled Google account.
3. Confirm your role badge. Navigation is intentionally different for each role.
4. On mobile, use the bottom dock for daily tools and the menu for everything else.

Standard handoff

Draft → **Submitted** → **Assigned** → **In Review** → **Copy Edit** → **Ready** → **Published**

Schedule and approval steps appear when required. Changes Requested returns the item for correction. A rejected Story must be reopened by Admin before Reporter revision.

Security rule: never share staff credentials, confidential source details, or private preview links. Sign out or lock a shared device when leaving it.

SHARED WORKING RULES

Save safely. Hand off once.

Article draft safety

1. Watch the save chip. **Saved** is the safest point to leave.
2. Use **Save draft** or **Ctrl+S / Cmd+S** before a handoff or long pause.
3. The same tab resumes its own draft quietly. Another tab/session may show one inline recovery notice.
4. Choose **Restore recovery copy** if needed, or **Discard old copy** if stale.
5. The Article form and publish action stay locked until that recovery choice is resolved.

No repeated prompt during editing

Inserting an image or table is an editor action. It should not submit the form or repeatedly show draft recovery.

Always wait for image/audio upload completion before submitting, refreshing, or closing the tab.

Version conflict

Stop editing. Compare with the saved version and reload the latest Article before changing workflow status. Do not repeatedly force Save or Publish.

Story saving is different

Reporter Story forms do not use browser autosave or the Article recovery notice. **Save Draft** is the server recovery point.

Story Save Draft requires a title and cover/thumbnail; MP4 is optional. Leaving before saving can lose form data.

Before every workflow action

- Finish uploads.
- Save content changes.
- Read the newest desk note.
- Use one clear status action.
- Confirm the success message.

Status meaning

Status	Owner / next action
Draft	Creator completes the package and saves.
Submitted	Waiting for Admin assignment or Copy Editor claim.
Assigned / In Review / Copy Edit	Assigned desk user reviews and saves changes.
Changes Requested	Reporter corrects, saves, and resubmits.
Ready For Approval	Admin performs final release check.
Approved / Scheduled	Admin schedules or publishes.
Published	Admin verifies public page, sharing, and distribution.

Create the reporting package

Dashboard | **My Work** | **My Stories** | **Media**

Reporter creates Story packages or quick direct Articles. A claimed/assigned Copy Editor may build a linked Article from a Story during desk review.

1. Open **My Stories → New Story**, or start from **My Work**.
2. Enter Story Title, Video Script, Category, Location Tag, Reporter Notes, and Source Info. The signed-in Reporter is the author.
3. Select **Source is confidential** when source details must remain internal.
4. Add a cover image or URL. MP4 is optional. The first image becomes the cover.
5. Wait for upload and video verification. Preview, replace, or remove the wrong media.
6. Choose **Save Draft** to keep it private or **Submit For Review** for desk handoff.

Upload limits

- JPG/PNG/WEBP images: maximum 5 MB each
- Optional MP4 videos: maximum 1.9 GB each
- No file-count or combined-video-size cap
- Reporter Media library accepts images; Story editor handles MP4

Important: Title and cover are required. MP4 is optional. Verify every upload before saving or submission.

When changes are requested

1. Open the item from My Work/My Stories.
2. Read the highlighted return reason and latest desk note.
3. Correct every requested item.
4. Choose **Save Changes** first.
5. Add an optional workflow note and **Submit For Review**.

Submitted and later stages are read-only unless the desk returns the Story as Changes Requested.

Reporter cannot

- Publish, approve, schedule, archive, delete, or assign
- Create a linked Article from a Story
- Edit Copy Desk QA or upload Article audio/TTS
- Use Review Queue, Copy Desk, Team, Analytics, Push Alerts, or Settings

Reporter handoff

- [ ] Names, numbers, dates, location, and spellings verified
- [ ] Source, rights, and credit information recorded
- [ ] Confidential source marked internal
- [ ] Correct image/video finished uploading
- [ ] Script matches the media
- [ ] Reporter notes explain desk context
- [ ] Package previewed before submission
- [ ] Submitted once—no duplicate Story

Verify, improve, and hand off

Dashboard | My Work | Copy Desk | Articles | Stories | Videos | Social Posts (read-only) | Media

1. Open **Copy Desk**.
2. For an unassigned Submitted Story choose **Claim Story**; for your assigned work choose **Start Review**.
3. Open it and download Reporter assets when needed.
4. Check source, location, notes, confidentiality, title, facts, media, captions, and credits.
5. Complete proofread, fact-check, headline, image optimization, and Copy Editor notes.
6. **Save content changes** before any workflow action.

Choose the correct exit

Move To Copy Edit
Keep polishing assigned work.

Request Changes
Return incomplete reporting with one specific actionable reason.

Ready For Approval
Hand clean, complete work to Admin. It then becomes read-only for Copy Editor.

Direct Article

1. Open **Articles → Create Article**.
2. Choose an existing category, then complete Compose, Quality, Media, SEO, and Publish.
3. Resolve all readiness blockers.
4. Choose **Submit for review**.

Copy Editor can create an Article but cannot publish it directly.

Publication production notes

- Send page, OCR, hotspot, caption, or linked-story quality notes to Super Admin.
- Super Admin applies those notes in the publication CMS and owns release.
- All publication CMS access is Super Admin only. Assignment does not grant Copy Editor access.
- E-Magazine is a monthly issue, not a daily E-Paper edition.

Copy Editor quality gate

- [ ] Facts, quotes, headline, and language checked
- [ ] Source/credit and sensitivity notes present
- [ ] Alt text, caption, crop, and image credit checked
- [ ] Copy notes explain material changes
- [ ] Return reason is specific and actionable
- [ ] Clean work is Ready For Approval—not Published

Copy Editor cannot manage users, use Push Alerts, publish content/E-Paper, or open Admin/System settings. Social Posts is read-only; Admin/Super Admin generates, approves, or dispatches.

Run the desk and own release

Review Queue | Assignments | Content Queue | Copy Desk | Push Alerts | Team | Analytics | Operations

Daily desk

1. Check Dashboard urgent counts, blocked work, failed work, and due items.
2. Open Review Queue and Assignments.
3. Choose **Assign**; set staff member, priority, and due time.
4. Use Content Queue to track work through every status.
5. Use **Request Changes** with a clear reason; use Reject only when intentionally stopping the item.

Approve and release

1. Open **Ready For Approval** work.
2. Read Reporter notes, Copy notes, source information, and activity.
3. Preview public presentation on desktop and mobile.
4. Choose **Approve**, then Schedule or Publish Now.
5. Verify the public URL before Push Alerts or social distribution.

Admin owns

Articles, Stories, Videos, Social Posts, Media, Polls, Categories, Contact Messages, Team, Analytics, AI Ops, Newsroom Settings, Push Alerts, and Operations Center.

Super-Admin boundary

E-Papers/E-Magazines, System Settings, Revenue, Business Value, Audit Log, Permission Review, Operations Diagnostics, and leadership-report management. Admin cannot create, edit, or remove a Super Admin.

Team safety

- [ ] Assign the least-privileged correct role
- [ ] Admin may manage Admin, Reporter, and Copy Editor
- [ ] Deactivate staff access promptly when duties end
- [ ] Never grant Super Admin for daily publishing work

Distribution order: Publish → open public page → verify headline/image/body/audio/links → test Share link → then prepare/copy Push Alert text or create a social post. Final push delivery uses the approved external channel.

Create a release-ready Article

Editor sequence

1. **Compose:** title, summary, body, author, category, and location.
2. **Quality:** source attribution, Reporter/Editor notes, flags, and readiness.
3. **Media:** featured image, alt text, caption, credit, and optional listen audio.
4. **Structure:** use inline Image or Table controls where they improve reading.
5. **SEO:** title, description, slug/canonical, keywords, and social image.
6. **Publish:** resolve readiness blockers and select Submit, Schedule, or Publish according to role.

Breaking news

Admin must upload the required breaking audio before publishing a Breaking Article. Confirm headline/location match the audio.

Do not refresh while the image or audio upload status is active.

Editorial check

- [ ] Headline accurate and supportable
- [ ] Summary matches body
- [ ] Author/category/location complete
- [ ] Names, dates, figures, quotes, links verified
- [ ] Source attribution and correction notes present

Media/accessibility check

- [ ] Featured image sharp and relevant
- [ ] Alt text, caption, and credit complete
- [ ] Inline images/tables work on mobile
- [ ] Listen/breaking audio works where used
- [ ] No upload remains in progress

SEO, brand, and public verification

- [ ] Slug and canonical URL correct
- [ ] SEO title/description/social image ready
- [ ] News sitemap option correct
- [ ] Lokswami branding/header present
- [ ] WhatsApp/Facebook/X/LinkedIn links work
- [ ] Copy Link opens the published page
- [ ] Prepared alert text matches headline and URL
- [ ] Desktop and mobile public page checked

If public presentation or sharing is wrong, do not prepare or externally deliver an alert. Correct the content/media, republish if authorized, and verify again.

From PDF to smooth public reader

Draft Upload | Pages Ready | OCR Review | Hotspot Mapping | Ready To Publish | **Published**

Super Admin upload and release

1. Open **E-Papers** or **E-Magazines → New Upload**.
2. Enter edition/issue metadata and upload the PDF.
3. Wait for page conversion. Never publish while pages are processing.
4. Clear missing-image, OCR, hotspot, linked-story, and readiness blockers.
5. Publish only from **Ready To Publish**.

Super Admin production QA

- [ ] Every expected page is present
- [ ] OCR text manually reviewed
- [ ] Hotspot boxes match story areas
- [ ] Headline and readable text are clean
- [ ] Missing pages/blockers recorded in notes
- [ ] Clean edition marked Ready To Publish

Public reader check

- Open first, middle, and final page.
- Turn pages on desktop and mobile.
- Test search/OCR text where available.
- Open several hotspots and linked stories.
- Use Share and open the copied public link.

Publication cadence

E-Paper: edition-based daily/news cycle.

E-Magazine: monthly issue product using the same production safeguards.

OCR is assistance, not final copy. A human must review names, headings, punctuation, and article boundaries before accepting OCR or creating linked Story drafts.

QUICK REFERENCE

Permissions and issue response

Action	Reporter	Copy Editor	Admin
Create Story package	**Yes**	No	**Yes**
Create direct Article	No	**Yes**	**Yes**
Edit own draft / assigned review work	**Yes**	**Yes**	**Yes**
Claim submitted work	No	**Yes**	Assign
Request changes	No	**Yes**	**Yes**
Mark ready for approval	No	**Yes**	**Yes**
Approve / schedule / publish	No	No	**Yes**
Review publication OCR/hotspots	No	No	No
Create/publish E-Paper/E-Magazine	No	No	No
Manage users / prepare alert text	No	No	**Yes***

*Admin manages newsroom roles except Super Admin. All E-Paper/E-Magazine CMS actions (view, upload, edit, OCR/hotspots, release and archive) are Super Admin only. Published reader pages remain public.

Common problems

Problem	Correct response
Recovery notice	Restore the needed Article copy or discard the stale one once. Editing stays locked until resolved.
Image/table not responding	Wait for upload, check editor selection, retry once. Do not create a duplicate Article.
Conflict detected	Stop, compare, and reload the latest saved Article before workflow actions.
Upload running	Keep the tab open. Do not submit, refresh, or navigate away.
Menu missing	Check role badge. Ask Admin only if the assigned role is wrong.
Submit disabled	Resolve required fields, upload, readiness, schedule, recovery, or breaking-audio blocker.
Public/share wrong	Do not prepare/deliver an alert. Correct, publish if authorized, and recheck.

Reporter close

No finished package left only in Draft; returned work has a clear next action.

Copy Editor close

Every claimed item is saved and actively reviewing, returned with a reason, or ready.

Admin close

Urgent queues, schedules, failed uploads, and public releases are checked.

One final rule: no external alert or campaign share points to a page that the Admin has not opened and verified after publication.
